

Fecal Immunochemical Testing

(FIT) Dr. Mandelbaum

FIT Colon cancer screening begins this month and Dr. Mandelbaum is prepared to assist you and your patients

- **Prioritization of FIT+ patients to office and colonoscopy done within 6 week benchmark**
 - **Adherence to CCO guideline for preparation and new post-polypectomy screening guideline with clear follow up recommendation to family MD**
 - **Recently completed Canadian Association of Gastroenterology SEE endoscopy course and extensive experience in colonoscopy with over 15 years in practice**
 - **All procedures done in hospital with sufficient time per case for polypectomy**
 - **Using water immersion technique for higher completion and polyp detection rates**
 - **Commitment to removing all resectable polyps at index colonoscopy using endoscopic mucosal resection (EMR) technique**
- 
- A man in a white tank top is performing a lat pulldown exercise at a gym. He is seated on a red bench, facing away from the camera, with his arms extended upwards and gripping a horizontal bar. The background shows gym equipment and a brick wall.

Patient comfort is the centre of every consultation and procedure
